

Recommended minimum daily feeding amounts of Meadow Hay (based on average of 90% DM) when used as the SOLE forage source.

Horse Bodyweight	Amount of Hay (fresh weight) per day
200kg	3.3kg
300kg	5kg
400kg	6.7kg
500kg	8.3kg
600kg	10kg
700kg	11.7kg

***based on minimum forage intake of 1.5% bodyweight dry matter*

Make any changes in forage type gradually, over a period of at least 14 days.
